

## SX.enterprise

➔ Infor ERP SX.enterprise provides a new way to run your business—helping you achieve new levels of performance, customer service, and growth.

### Do business better.

If you look up the word *complexity* in the dictionary, do you find your business model there? That's how it feels for many distribution companies today—especially if your monthly transactions and SKUs number in the tens or hundreds of thousands. Under constant pressure to provide better customer service, increase inventory turns, and optimize transportation costs, you can't survive without a full range of enterprise functionality tailored to your unique requirements. To meet the challenge, you need a powerful enterprise solution that meets your definition of comprehensive—one that is designed specifically for complex distribution environments like yours.

### Leverage experience.

At Infor™, our professionals—many with more than 25 years of experience—are helping forward-thinking companies like yours solve their toughest business challenges. That experience is built in to Infor ERP SX.enterprise 6.0, a comprehensive solution designed specifically for distribution companies with complex business models. More than 800 customers with revenues ranging from \$50 million to \$1 billion or more have implemented this powerful solution to reduce costs, maintain optimum customer service levels, and meet strategic expansion goals.

## Get business specific.

Infor ERP SX.enterprise is a full-featured client/server system that supports flexible, event-driven operations running on the latest Windows®-based connectivity standards. It provides an across-the-board core distribution solution that delivers increased efficiency and improved performance. The solution is built on Infor Open SOA, where interoperable applications and composite business services help customers easily add, change, upgrade, or modify solutions as their business requirements change. Key features include:

- **Order entry**—Advanced order controls let you take advantage of complex ordering formulas while considering important factors such as average sale quantity.
- **Inventory control**—Efficient tools let you easily establish reorder points, print physical count sheets, and perform a variety of other inventory control processes. Vendor Managed Inventory tools help you handle off-site inventory managed by vendors.
- **Kit production**—Manage kit production more efficiently through innovative, automated tools for packaging and marketing products.
- **Purchase order**—Manage the purchase of both stock and non-stock orders.
- **Service warranty**—Streamline service and repair functions.
- **Warehouse management**—You gain an integrated solution for real-time management of warehouse workflow.

Infor SX.enterprise encompasses the full range of integrated functionality you need to do business better at every level of your enterprise:

- **Financial management** designed specifically for the unique challenges of operating multiple locations
- **Performance management** for managing your business against your strategic goals
- **Supplier relationship management** for creating a more collaborative environment for you and your suppliers
- **eCommerce tools** for doing business seamlessly with customers and suppliers 24x7
- **Customer relationship management** to help you enhance your service levels

## See results now.

Infor ERP SX.enterprise is a complete solution that is helping distributors worldwide strengthen their performance and drive strategic expansion. Easy to implement and use, the solution is helping customers see significant bottom-line business benefits such as:

- 2% increase in gross profit
- More than \$300K savings in the first six months
- 65% reduction in receiving errors
- 300% improvement in pick efficiency
- 99.9% inventory accuracy
- 50% increase in warehouse volume with no decline in service levels

## About Infor.

Infor acquires and develops functionally rich software backed by thousands of domain experts and then makes it better through continuous innovation, faster implementation options, global enablement, and flexible buying options. In a few short years, Infor has become the third largest provider of business software. For additional information, visit [www.infor.com](http://www.infor.com).
